Ranger-Guided Activities

Friday, August 6

4:00PM – Starry Skies

What constellations can we see at night overhead? Ranger Tina will help you to make a constellation finder and a constellation pendant to help you to remember what the constellations look like and where to find them at night. Meet at the picnic shelter. *30-45 minutes.*

9:00PM – Discovering the Past of the Columbia River Valley

How do people know how the rocks formed and the land changed before people arrived in the Columbia River Valley? Geologists collect clues and evidence and put them together just like a detective. Ranger Tina will present the clues so you can find out for yourself at tonight's slide show. Meet at the Amphitheater in the campground. *30-45 minutes.*

Saturday, August 7

2:00PM – Geology Rock and Roll

Look at rocks found in the Lake Roosevelt area and discuss with Ranger Tina how they formed and why people look and collect rocks. You are welcome to bring along any interesting rocks you have found to find out what they are and how they formed. Meet at the picnic shelter. *30-45 minutes.*

Sunday, August 8

11:00AM – Recyclable Bags

Join Ranger Shiela for an art project using old paper grocery bags. Each participant will learn how to make their own Native American Parfleche pouch to take home. Meet at picnic shelter. We provide the art supplies, you provide the imagination! *1 hour.*

All activities will qualify visitors for the Junior Park Ranger program.
